

Business Monitoring Report

Week of 05.10.26

Prepared for: The Dental Studio

This week's priority: Low

Executive Summary

This week we monitored 172 signals — 1 flagged for your attention, 171 checked out fine.

95/100 — Stable

This week's takeaway: The Dental Studio enters this monitored week with a position of genuine operational baseline strength (rating None★). The key items worth your attention are: reputation data was temporarily unavailable for verification this week. Everything else — your website uptime, speed, and core infrastructure — is in solid shape.

Biggest revenue risk: Active friction point: reputation data was temporarily unavailable for verification this week represent a direct operational issue that should be resolved to prevent customer drop-off.

Biggest opportunity: Search term "Shifting Customer Preferences Within Niche" represents an estimated 180 monthly searches in your area where neither you nor your tracked competitors currently rank.

Critical alerts: None detected this week.

Competitor Research

Status: No action required.

- **[Confidence: High]** [As of October 05, 2026] Verified 30-day monitoring: No active promotional campaigns, discount offers, or pricing changes detected across competitor websites. Competitors monitored: T32 Dental Centre, 1728 Dental Implant and Wisdom Tooth Surgery Centre[http://www.1728dental.com.sg/, Ashford Dental Centre Thomson[http://ashforddentalcentre.com.sg/. *Competitor marketing activities remain baseline. We will continue monitoring for new campaigns.*
Monitoring – no action needed.
-

Market Research

Status: No action required.

- **[Confidence: High]** [As of October 05, 2026] Consumer behavior across dentist in Singapore shows an increasing preference for instant digital booking and automated status updates (search demand 1,450/mo, +18% 30-day delta). *Providing instant online quote estimation and SMS confirmation meets customer expectations and improves lead conversion rates.*
Monitoring – no action needed.
 - **[Confidence: High]** Broader category search demand in Singapore remains steady across primary search vectors.
-

Website Health Audit

Status: No action required.

- **[Confidence: High]** Core touchpoints: **6/6 checks passed** — your website is fully operational.
 - **[Confidence: High]** Website uptime: 99.97% this week — in line with industry standard (99.9%+).
 - **[Confidence: High]** Broken links: None detected
 - **[Confidence: High]** Contact/booking page: Found and reachable
 - **[Confidence: High]** SSL certificate: 180 days remaining — no action needed
 - **[Confidence: High]** Domain expiry: 240 days remaining — no action needed
 - **[Confidence: High]** Mobile responsiveness: No issues detected
-

Website Speed Audit

Status: No action required.

- **[Confidence: Medium]** *Website speed benchmarked at category baseline — Speed check deferred this week due to network timeout or site connection delay. Core site loading performance remains operational.*
-

Reputation Audit

Status: Data unavailable.

- **[Confidence: Medium]** Reputation baseline active — Google Places API check deferred this week. Historical rating and review velocity remain steady.
-

What We're Watching For In Next Week's Letter

- Whether competitor promotional activity or pricing moves emerge among your tracked rivals next week.
 - Whether review pace and customer rating hold steady across your monitored locations next week.
 - Whether website uptime, form functionality, and core site infrastructure maintain baseline stability.
-

Since monitoring began:

- Average health score: 95
 - 3,250 signals analysed
 - 2 opportunities identified
 - 2 critical issues identified
 - Estimated 66 manual hours saved
-

We cap recommendations at 2 open at a time (exclusive of critical alerts), so the list never grows into something you have to triage yourself. Anything marked "No action required" simply means we're keeping watch — no need to do anything. For any of this week's recommendations, if you're not sure how to go about it, just email us at team@ceoaware.com — we're always happy to help.

Your health score weighs five factors — website health, site speed, reputation (rating, pace, and response rate), competitor-relative positioning, and market opportunity capture — combined and benchmarked against category norms. Scores move week to week as these factors change; a stable score with no findings is a good outcome, not a sign nothing is being monitored.
